

Guide to finding standards on the NSAI database

A standard is a formal document that establishes uniform engineering or technical criteria, methods, processes and practices. The library provides full-text access to Irish (IS), European (EN) and International (ISO) standards through a subscription to the National Standards Authority of Ireland (NSAI) database.

NUI Galway students and staff can access the NSAI database via the library website www.library.nuigalway.ie

Go to the library website www.library.nuigalway.ie and enter NSAI in the search box

In the NSAI database you can search for standards by standard number or by title:

If you know the number of the standard you are looking for enter it in the **Standard Number** search box and hit search:

Search Standards by Title: You can also search standards by title keywords in the **Title** search box

In the results page click on [Click2View](#) to get the **full-text PDF** of the standard:

Find standards related to particular area of standardization:

Standards are classified into 40 areas of standardization. Search by International Classification code to get standards related to a particular area of standardization.

Click on **i** next to the **IC** search box to get the full list of ICS codes.

Search for equivalent standards:

The NSAI database does not provide full-text access to British Standards. You can however search for British Standards on the All Publishers section of the database.

If you want to see standards from other publishers (e.g. British Standards) select **All Publishers** from the **Publisher** drop down menu:

You won't get full-text access to standards in the All Publishers database but you will be able to search for equivalent IS, EN or ISO standards through checking the **Referenced Standards** or the **International Classifications**

Results 1 to 1 of 1

Copy the Referenced Standard number or International Classification and paste into the search box in the NSAI section of the database.

Remember to remove BS from the standard number when you are searching in the NSAI only section of the database

For further help with accessing standards via the James Hardiman Library please contact library@nuigalway.ie
